

## DISTRICT TEST COORDINATOR

In an effort to better utilize test results, the district will utilize a test coordinator. This person shall have the knowledge and expertise to effectively interpret the test score, both group and individual, to teachers, administrators and Board of Education members. This person could supplement what is now being done in the area and perhaps add the consistency and assurance necessary for improving the instructional program.

The coordinator's responsibilities would be limited to illustration and interpretation of test results, thus allowing a thorough understanding as teachers and administrators approach instructional improvement.
